

NOTICE OF POTENTIAL BREACH OF PROTECTED HEALTH INFORMATION

June 24, 2019

On April 9, 2019, while moving offices, it was noted that some files that contained the protected health information of certain clients of The CARE Center, Inc. were not contained in the filing cabinet where they would typically be located. Staff searched all areas where the files may have been placed, but, on April 29th, it was determined the files were no longer in the possession of staff or business associates.

While we have reason to believe the files were discarded without being viewed by a third party, some protected health information of clients of The CARE Center, Inc. was contained in the potentially compromised files. If you were a client of The CARE Center, Inc. between October of 2011 and June of 2019, please contact (724) 489-9100 ext. 4205 to learn if your information was involved in the potential breach.

We are deeply sorry for this situation and apologize for any stress and worry it has caused.
